OVERVIEW:

dp-PRO is a quarterly magazine designed to educate key players in the utility industry and serve as a forum for new ideas. Articles must be original, and not run in other publications. Articles are written by subject matter experts who are respected for their in-depth industry knowledge.

AUDIENCE:

dp-PRO addresses the interests of all stakeholder groups and all affected disciplines within these groups. The magazine reaches facility owners and operators, facility maintenance companies, contractors, One Call Center members, engineers, claims, public works departments, risk management operations, purchasing, safety & training, and others that protect the underground infrastructure and impact damage prevention. It is read by seasoned professionals as well as people new to the industry.

PRINT & DIGITAL:

Our print edition is distributed to over 30,000 across the US and Canada. To help make the dp-PRO available to more readers, we also produce a digital version each issue.

An additional eight pages of original content is placed in the digital version and emailed to 40,000+ inboxes as well as provided to damage prevention partner organizations so they can send it out to interested parties in their areas.

Submitted articles may be placed in either the print or digital version based on editor's discretion. Articles appearing in the magazine are also posted to the website, dp-pro.com.

SALES-BASED CONTENT:

dp-PRO works diligently to maintain the reputation it has earned as an educational publication by strict enforcement of the article guidelines. This reputation enhances the integrity of the content we provide and the credibility of the authors who provide it. Articles are subject to advisory board review and will be rejected if found to contain excessive sales-based content. Articles chosen for publications may be subject to editing.

LIMITED IMAGE USE AGREEMENT

All images provided are assumed to be provided to Infrastructure Resources, LLC for unlimited ongoing use, including public sharing in the dp-PRO Photo library and accompanying other articles in future publications. The included Image Usage Agreement must be completed for ALL submitted photos and graphics for which you wish to limit use.

ARTICLE GUIDELINES

- One page of content contains 500-600 words and 2-3 images. Unless otherwise arranged with the editor, articles should be a minimum of 500, and maximum of 1,200 words in content.
- When possible, all stakeholders should be considered regarding content.
- Try to focus on positive outcomes. The underlying theme of the magazine is the same principle that guides the Common Ground Alliance, “damage prevention is a shared responsibility.”
- Whenever possible articles should be designed to contain specific takeaway ideas that readers can put to work. These ideas can be highlighted throughout or summarized at the end of the article.
- When appropriate, use bullet points, sub-headings, numbers, or steps.
- Readers relate better to examples over theory. Cite examples or case studies often.
- Technology introduction articles are designed to give people a quick understanding of how the technology can help them, as well as an overview of how it works.
- Articles are selected for publication based on suitability and space allocation, at the magazine’s discretion.
- Articles may be used by publisher in print, digital version or any other format including social media at the magazine’s discretion.
- The author of the article warrants that the work submitted meets the appropriate criteria and does not infringe upon any copyright or intellectual property laws.
- Absolutely no sales- or marketing-based content allowed.
- Try not to use industry acronyms and jargon which non-experts will not understand. If an industry term is required, include a footnote explanation.

PHOTOS AND GRAPHICS

- Photos and other graphics help readers understand the article’s message and will draw them to the article.
- Acceptable images include (but are not limited to): action shots, products in use, company logos, charts, graphs.
 - Graphics (such as tables in Excel) should be converted to a .pdf, .jpg or .tif file.
 - If you are not sure how to do this, or are unable, we will gladly assist you.
- Unacceptable images include (but are not limited to): Product marketing shots, images that disparage another company/product, images not owned by the author, web images.
- Photos and graphic images must be submitted in the following formats/sizes:
 - Adobe Illustrator eps or ai files, any size.
 - Photoshop jpeg or eps file, minimum of 300 dpi, as large as possible.
- Submit images as separate files. Do NOT embed images in the document.
- You are welcome and encouraged to send an assortment of photos and graphics. Read and understand the Image Use Agreement.

SUBMITTED ARTICLES SHOULD INCLUDE:

- Author's name and title as it should appear in print.
- Affiliations with industry associations for the byline.
- Short Bio (2-3 sentences) on Author's industry background for the byline.
- Authors email and phone number if it is authorized for publication.
- Article content as a .doc, .txt or .pdf file. No formatting is required.
- Associated photos or graphics as separate files according to standards stated above.
